Dear Hiring Manager,

Introduction

I am writing to express my interest in a **part-time position** in the fields of software engineering, software development, computer science research, or education. As a Master's graduate in Software Engineering with extensive tutoring and freelance project experience, I bring a unique combination of technical depth, teaching ability, and independent project execution.

Why Me

My background blends rigorous academic research with real-world development:

- **Software Development:** I design and build applications, websites, and systems for private clients as a registered sole proprietor. My work spans Python, Flutter/Dart, SQL/NoSQL databases, and modern backend frameworks.

- **Research:** During my MSc, I conducted independent research on computational modeling and physics-informed neural networks, developing advanced Python-based simulations.

- **Education:** Through tutoring roles at Sami Shamoon College, Achva Academic College, and Aleh Association, I have gained strong skills in communicating complex concepts clearly to diverse learners.

Current Goals

At this stage, I am seeking a part-time role where I can:

- Apply my software engineering expertise in practical projects.

- Contribute to research or educational technology initiatives.

- Balance development work with my strong passion for teaching and mentoring.

Closing

I would welcome the opportunity to discuss how my skills and experiences align with your team's needs. Thank you for considering my application, and I look forward to the possibility of contributing to your organization.

Sincerely,

Luba Ira Korlat
