

Luba Ira Korlat

Software Engineer | Python | Flutter | Backend | AI/RAG

Hebrew Name: לובה אירה קורלט

Country: Israel | City: Beersheba

Country Code: +972 | Phone Number: 527044577 | Email: lubacareer@gmail.com | Another Email: lubani@lubacorp.com

Portfolio: portfolio-blush-five-82.vercel.app | GitHub: github.com/lubacareer | Old GitHub: github.com/lubani | LinkedIn: linkedin.com/in/luba-ira

Professional Summary

Software Engineer and registered freelance developer with an M.Sc. in Software Engineering. Experienced in Python, Flutter, backend APIs, databases, AI/RAG prototypes, NLP, and numerical modeling. Strong background in algorithms, debugging, teaching, and turning requirements into working software.

Technical Skills

Languages: Python, TypeScript, Dart, Java, C++, C, C#, SQL, R, HTML, CSS

Backend: FastAPI, Django, Node.js, NestJS, REST APIs, testing, authentication concepts

Frontend and Mobile: Flutter, React, React Native, Next.js, Android development

AI and Data: RAG, NLP, TensorFlow, Keras, OpenCV, PINNs, model evaluation

Databases and Tools: PostgreSQL, MySQL, MongoDB, Firebase, CouchDB, Git, Docker, Linux, CI/CD

Education

Master of Science in Software Engineering

School: Sami Shamoon College of Engineering | Location: Beersheba, Israel

Degree: Masters | Field of Study: Software Engineering | GPA: 96/100 | Dates: 2022 - 2024

Graduated cum laude. Thesis: 2-Phase Stefan Problem for Lunar Regolith Melting. Relevant Coursework: Deep Learning, Advanced Algorithms, Natural Language Processing, Computer Vision, Advanced Databases.

Bachelor of Science in Software Engineering

School: Sami Shamoon College of Engineering | Location: Beersheba, Israel

Degree: Bachelors | Field of Study: Software Engineering | GPA: 80/100 | Dates: 2018 - 2022

Final Project: Hebrew text summarization using natural language processing.

Work Experience

Software Developer

Company: Self-Employed | Location: Beersheba, Israel | Dates: January 2025 - Present

- Registered Sole Proprietor delivering mobile apps, websites, backend systems, and technical prototypes for private clients.
- Work with Python, Flutter, databases, APIs, and full project implementation from requirements to delivery.

Instructor

Company: Cyber Education Centre | Location: Beersheba, Israel | Dates: November 2025 - Present

- Teach communication networks, sockets, client-server programming, and cybersecurity fundamentals in the Magshimim Program.
- Review student code and provide feedback on logic, debugging, and correctness.

Computer Science and Mathematics Tutor

Company: Alut Organization and Ono Academic College | Location: Beersheba, Israel | Dates: January 2026 - Present

- Teach computer science and mathematics to students on the autism spectrum using structured, practical examples.

Tutor and Academic Transcriber

Company: Aleh Association | Location: Beersheba, Israel | Dates: September 2023 - December 2025

- Tutored students with disabilities in computer science and software engineering subjects.
- Created accessible summaries and clarified academic content for better understanding.

Software Engineering Tutor

Company: Sami Shamoon College of Engineering | Location: Beersheba, Israel | Dates: April 2023 - May 2024

- Tutored algorithms, data structures, object-oriented programming, and core software engineering courses.

Database Practice Tutor

Company: Achva Academic College | Location: Beersheba, Israel | Dates: November 2021 - April 2022

- Led SQL, relational modeling, and normalization practice sessions for Information Systems students.

Military Service

National Service Secretary

Company: Beersheba Magistrate Court | Location: Beersheba, Israel | Dates: September 2011 - September 2012

- Completed one year of Sherut Leumi National Service in an administrative role.
- Operated the court information system, filed and organized case files, and supported daily administrative workflows.
- Handled legal-administrative documents with accuracy, confidentiality, and attention to detail.

Selected Projects

AUT-Guard

Technology: Python, RAG, NLP | GitHub: github.com/lubacareer/AUTGuard

- Built a modular AI/RAG system for context-aware autism and disability knowledge responses in Hebrew and English.

HeatEquationSimulator

Technology: Python, TensorFlow, Keras, CUDA, Tkinter, PINNs | GitHub: github.com/lubani/HeatEquation-Simulator

- Developed a Python simulation tool for the heat equation and two-phase Stefan problem as part of master's research.

Mazilon

Technology: Flutter, Mobile Development | GitHub: github.com/Tovli/Mazilon

- Collaborate on a Flutter mental-health and personal-planning mobile app.

Portfolio Website

Technology: Flutter, Web | GitHub: github.com/lubacareer/portfolio

- Built a Flutter-based portfolio website presenting projects, skills, and professional background.

HebSum

Technology: Python, NLP | GitHub: github.com/lubani/HebSum

- Developed Hebrew text summarization and preprocessing workflows for NLP experimentation.

Additional Projects:

IRCourse - Python information retrieval exercises. ccomp - Custom C compiler using C, Flex, and Bison. math - Python teaching and visualization demos.

Research Experience

Research Student

Company: Sami Shamoon College of Engineering | Location: Beersheba, Israel | Dates: 2022 - 2024

- Developed Python simulations, numerical methods, and Physics-Informed Neural Networks for heat-transfer research.
